# H-500

Cellular energy powered from within\*

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

# H-500 Supports Cellular Energy and Antioxidant Defense\*

Provides daily antioxidant support\*

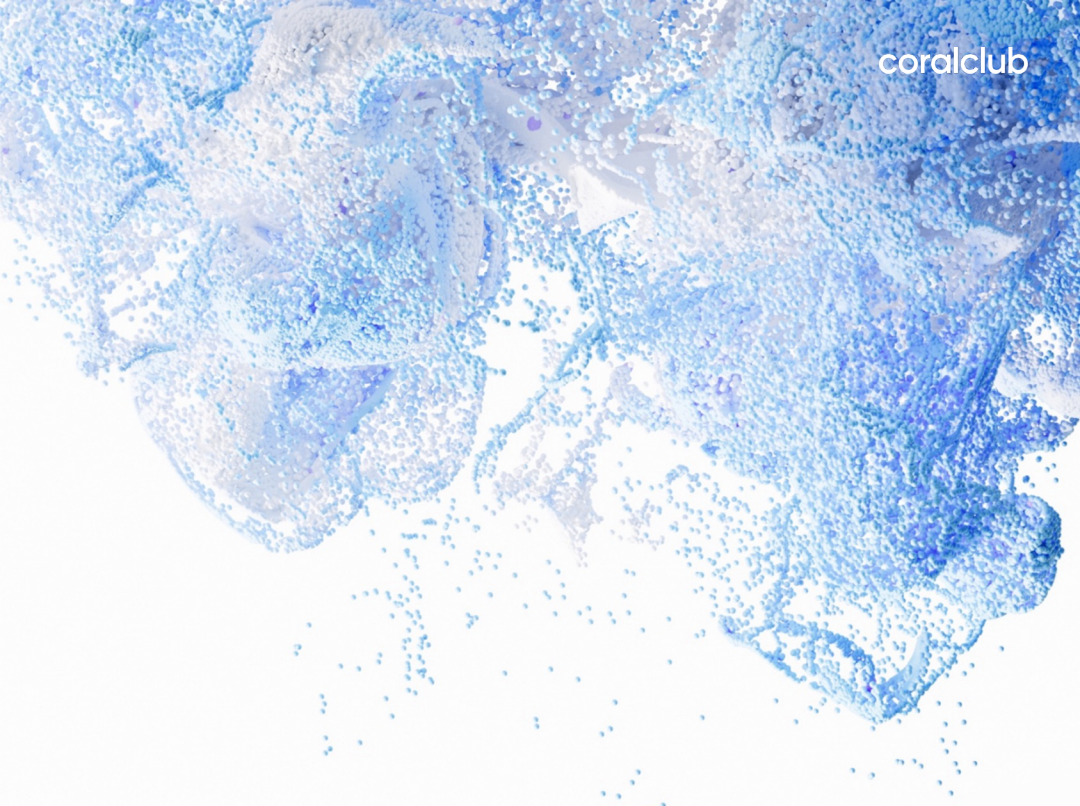

Supports normal cellular function and overall vitality\*

Supports energy metabolism and helps reduce occasional tiredness.\*

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

# Free Radicals: Molecules Linked to Cellular Stress

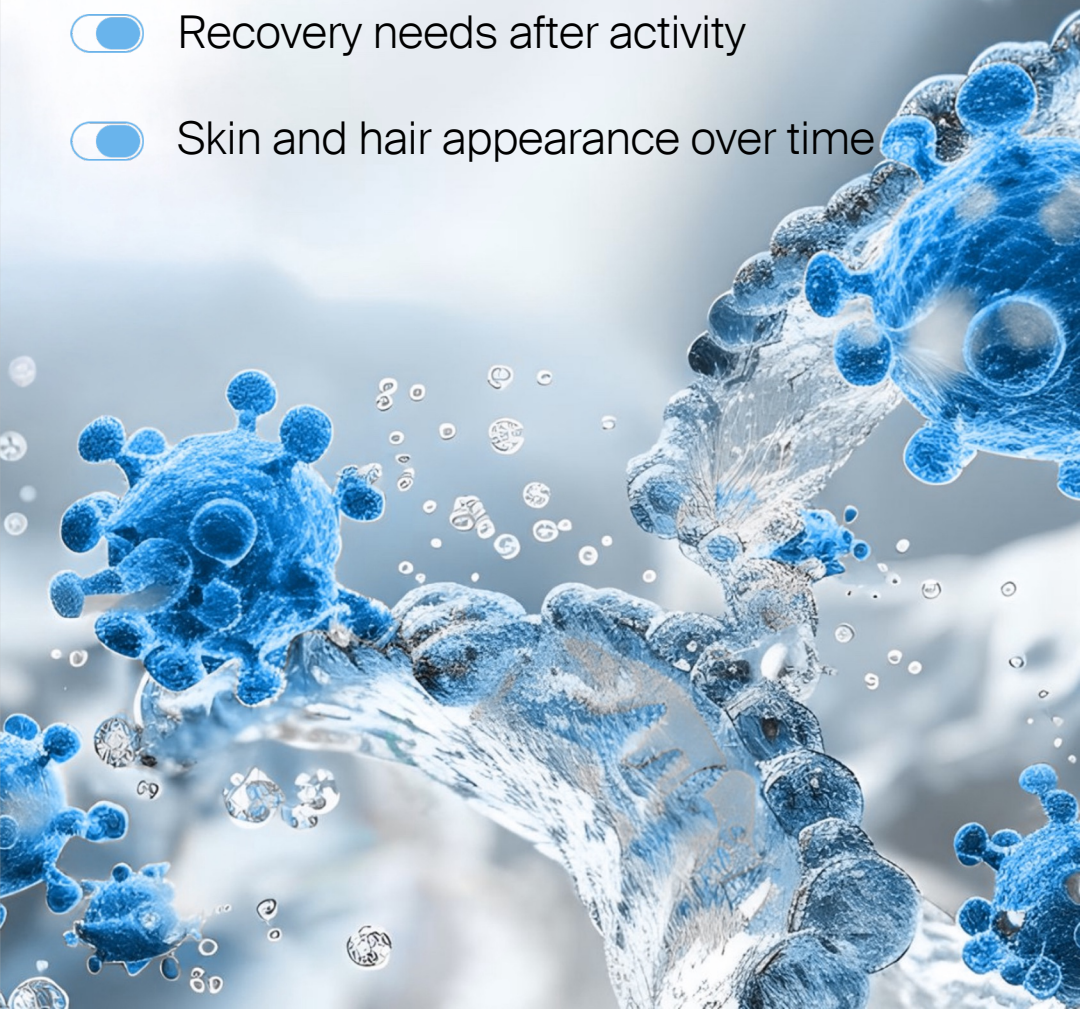

Environmental factors, everyday stress, and dietary patterns can contribute to the formation of free radicals within the body.

When free radicals accumulate, they are associated with oxidative stress – a process that can challenge the body's normal protective balance.

Free radicals are unstable molecules that interact with other molecules in the body as part of normal biological processes.

# Why Managing Signs of Oxidative Stress Matters

- Daily physical and mental demands
- Environmental and lifestyle factors
- Immune demands during periods of stress
- Recovery needs after activity
- Skin and hair appearance over time

# Antioxidants: Part of the Body's Natural Defense System

Antioxidants are compounds that help support the body's natural ability to manage free radicals as part of normal biological processes. The body produces its own antioxidants, and additional antioxidants are also obtained through a balanced diet.

Dietary antioxidants—from foods and supplements—can help support the body's natural antioxidant defenses, particularly during periods of increased environmental or lifestyle stressors.

# H-500

A innovative dietary supplement formulated to support antioxidant defenses and cellular energy.\*

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.\*

# H-500 Supports Cellular Energy and Antioxidant Support

- Supports normal cellular function\*
- Helps support the body's natural antioxidant defenses\*
- Supports energy metabolism and daily vitality\*

What makes H-500 unique:  
A signature blend of minerals formulated to support cellular energy and antioxidant defenses\*

K

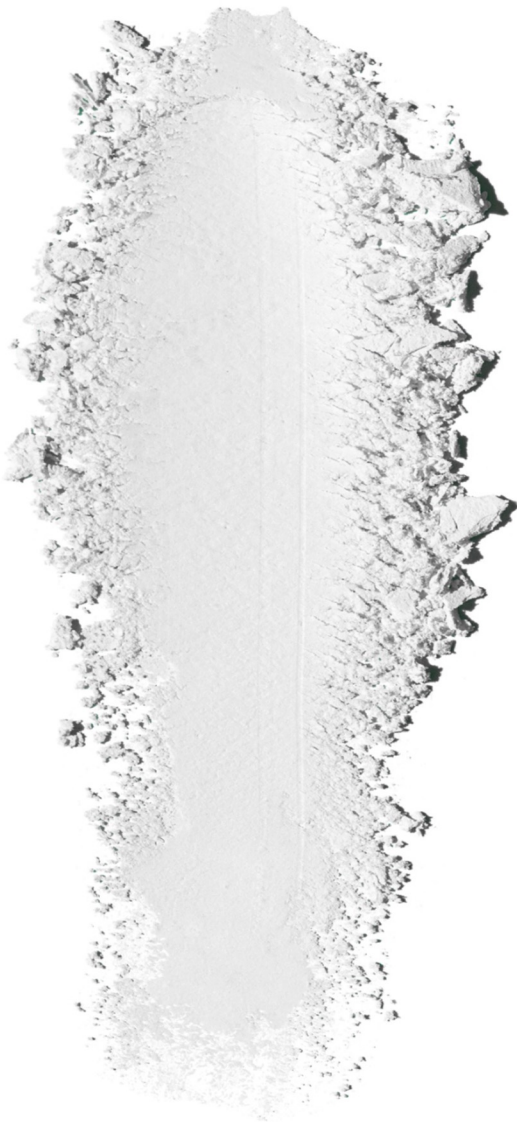

Mg

Na

Si

# Where Does the Hydrogen Come From?

H-500 contains a blend of mineral salts, including: potassium citrate, magnesium citrate, potassium ascorbate, sodium borate, and silicon dioxide.

## What Happens When You Take H-500

1

The mineral salts dissolve during normal digestion, releasing ions.

2

These ions interact with water and other compounds as part of normal chemical processes.

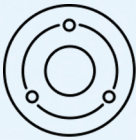

3

This process creates a hydrogen-rich environment associated with the formulation's antioxidant support design.\*
